--	------------

YOUR POTENTIAL £ PER QOF POINT (AVERAGE) INCLUDING CONTRACTOR PRICING INDEX (CPI)	£178.89
---	---------

"We were delighted with the report that Interface produced. We couldn't believe how many patients we had that were potentially not being included on disease registers - this will undoubtedly have a big impact on our QOF income going forward and more of our patients will be better managed by virtue of their conditions being reviewed and monitored. We also found the consultancy day immensely beneficial - we had recouped our outlay by 10:30am!"

Mike Wain, Practice Manager, Blackpool

KEY POINTS

Please refer to individual patient level summaries for QOF achievement breakdown per indicator (provided as an additional service)

If the existing register patients QOF achievement is such that maximum points are being achieved, then adding in the new patients with all QOF achievement fulfilled will potentially provide an increase in income of £18168

Practice clinical domain prevalence before and after audit against national

Potential QOF £ per point measured against national baseline
